## DETAILED ACTION

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

Claims 15-22 are rejected under 35 U.S.C. 102(e) as being clearly anticipated by Acres US Patent 6,565,434. A detailed reading of Acres by an artisan of ordinary skill would teach all of the claim limitations of the claims above. Specifically, Column 17 lines 54-60 discloses a translator 353 that integrates protocols between the host and the bonus promotion system. Additionally, column 24:8-25 discloses that each machine communication interface (MCI) further includes a replication port 78 which emulates the communication port on the gaming device. This facilitates the use of older third party accounting systems even when an MCI is connected to the gaming device's communication port. The MCI can be programmed to perform a translation function wherein the MCI transmits data to the data collection system in whatever language the system requires, e.g. "SAS". With respect to the rest of the details of the claimed subject matter please see columns 41-54 where a detailed description of the Machine Communication Interface is outlined.

***Citation of Pertinent Prior Art***

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The following prior art all relate to gaming over a network using a communication protocol: Guinn et al '648, Crevelt et al '983, Miodunski et al '540, Crumby '170.
